

Please do NOT overturn New Jersey's wonderful DO NOT CALL law. It has been a tremendous success in keeping telemarketers and businesses such as chimney sweeps, aluminum siding and replacement window sellers, etc. from flooding our home with calls. We pay for our phone service. We have the right not to be inundated with unwanted phone calls, some of which come at very annoying times, such as at dinner or after 9 at night. The Federal do not call law has worked and now the NJ law is working. Please don't undercut our state's law which was passed by our legislature and represents the voice of the people of New Jersey. Thank you for allowing me to comment.
